FLEX-PLUGS, PRE-PLUGS, AND PRE-PLUG SNAGLESS MODULAR BOOTS

Identify your unshielded twisted-pair (UTP) systems with colour-coded Flex Plugs, Pre-Plugs, and Pre-Plug Snagless Modular Boots.

Key Features

▶ Quickly organizes your patch systems—makes relocating workstations a breeze.

▶ Seven colours to choose from—many combinations possible.

Specifications

Connectors—Flex-Plugs: Used with RJ-45 connectors; Pre-Plugs and Pre-Plug Snagless Modular Boots: Fits over an RJ-45 connector

Weight—28.3 g

Flex-Plugs and Pre-Plugs let you easily identify different categories of cabling—and department and system applications—via a simple colour-coding method.

Colour-coding makes moving and troubleshooting less of a puzzle, since one application can be easily differentiated from another.

Flex-Plugs are ideal for colour-coding different categories of patch cords. Attach the colour cap to your existing terminated patch cords and remove or change them as needed.

Attach Pre-Plugs before you terminate RJ-45 plugs. Pre-Plugs cannot be removed after termination.

Pre-Plug Snagless Modular Boots work like Pre-Plugs, but they keep the connectors from snagging when you pull the cable through tight spaces.

Each bag includes 50 plugs or boots of the same colour.
