PC Data Transfer Cable

Transfer data the easy way—no disks!

Key Features

Maximise software you use to download files from two PCs.

DB25 and DB9 connectors mean one cable handles all serial port styles.

Easy-to-use thumbscrew attachment.

Eliminate the irritating, hassle and time-consuming task of disk-swapping between your two desktop PCs or your notebook/laptop and desktop PCs. Now you can share files the easy way—with PC Data Transfer Cables.

Use PC Data Transfer Cables to connect two PCs through their parallel or serial ports. Then use a software communications program such as LapLink or DOS 6.x Laplink utility to facilitate the file transfer.

Direct file transfer cuts costs and time, and increases

security. And you don't need to carry diskettes around—diskettes that can be lost, stolen, or damaged. Just attach one end of a Data Transfer Cable to your desktop computer, leave it attached for easy access.

The Parallel Cable is DB25 male to DB25 male, with 11 conductors. The Dual Serial Cable is DB25 female and DB9 female to DB25 female and DB9 female cable.

For these and other components...

Call our expert Technical Support Staff for all your Cable and Connector needs. They'll help you find the best equipment for your application.

Ordering Information

This information will help you place your order quickly.

Specifications

Cable Construction—Beige PVC

Conductor Gauge—28 AWG

Number of Conductors—BC01801: (11), BC01802: (7)

Shield—100% foil shield with a drain wire

Connectors—BC01801: (2) DB25 male; BC01802: (2) DB25 female, (2) DB9 female

Hoods—Molded
