### **Async RS-232 ↔ 422/530 Interface Converters and Rackmount Cards** **Async RS-232 ↔ 422/485 Interface Converters and Rackmount Cards** **Async RS-232 ↔ 2-Wire RS-485 Interface Converters**

Use your PC for RS-422 or RS-485 communications, data acquisition, and control applications.

#### Key Features

##### Async RS-232 ↔ 422/530:

- ▶ Transmits data over two twisted pairs.
- ▶ Use in point-to-point applications.
- ▶ Data rates up to 19.2 Kbps.
- ▶ Loops back all RS-232 handshake signals.

##### Async RS-232 ↔ 422/485:

- ▶ 4-wire model transmits data and one control signal over one or two twisted pairs; 2-wire model transmits data over one twisted pair.
- ▶ Use in point-to-point or multipoint applications.
- ▶ Data rates up to 115.2 Kbps.

#### Overview

All of these Converters and Cards allow bidirectional data conversion from your RS-232 machine. Since the Converters draw all necessary operating power from the RS-232 interface, you don't have to worry about changing batteries or supplying AC power. The Cards draw their operating power from the rack.

The Async RS-232 ↔ 422/530 Converter or Card lets devices with an RS-232 interface communicate with RS-422 devices. The Converter or Card transmits data up to 1219 m (4000 feet) away by passing data signals (TXD and RXD) over two twisted pairs at up to 19.2 Kbps. RS-232 handshaking signals are looped back.

The RS-232 ↔ 422/530 Interface Converter plugs directly into a DB25 (or DB9, depending on which model you ordered) serial port. A DTE/DCE switch, mounted on the front, eliminates the need for RS-232 cross-pinned adapters. (If you're using a DB9 model, you need to connect to a DTE device unless you use a null-modem cable or adapter.)

The RS-232 ↔ 422/530 Dual Rackmount Cards feature easy-to-read front-panel LEDs, which monitor the status of data transmission. If you need a rack for holding multiple cards, these were designed to fit in the MicroRACK (see the *Ordering Information* section).

Communicate with one or more RS-485 devices from your asynchronous device with the Async RS-232 ↔ 422/485 Converter or Card, or the Async RS-232 ↔ 2-Wire RS-485 Converter. The 4-Wire Converter or Card

transmits data and one control signal up to 1219 m (4000 feet) away over one or two unconditioned twisted pairs at up to 115.2 Kbps.

Use the Converter or Card to support multiple RS-485 drivers and receivers. Set the RS-485 side impedance either high (for multipoint applications) or low (for point-to-point applications), and the carrier to "constantly on" or "controlled by RTS."

The RS-232 ↔ 422/485 Interface Converter plugs directly into a DB25 serial port. A switch-selectable DTE/DCE, mounted on the front, eliminates the need for RS-232 crossover cables.

The RS-232 ↔ 422/485 Rackmount Cards feature easy-to-read front-panel LEDs, which monitor the status of data transmission. If you need a rack for holding multiple cards, these were designed to fit in the MicroRACK (see the *Ordering Information* section).

### Specifications

**Protocol** — Asynchronous

**Operation** — IC470A-

IC475C: Full-duplex, 4-wire; 2 unconditioned twisted pairs;

IC476A-IC480C: Half- or full-duplex, 2- or 4-wire unconditioned twisted pair

IC520A-IC521A: Half-duplex, 2-wire unconditioned twisted pair

**Speed** — IC470A-IC475C:

Up to 19.2 Kbps;

IC476A-IC480C, IC520A-IC521A: Up to 115.2 Kbps

**Maximum Distance** —

1219 m (4000 feet)

**Connectors** — IC470A:

(1) DB25 male or female, (1) terminal block;

IC471A: (1) DB25 male or female, (1) DB25 female (RS-530);

IC472A: (1) DB25 male or female, (1) DB25 male (RS-530);

IC473A: (1) DB9 male or female, (1) terminal block;

IC474C: (2) RJ-11, (2) RJ-45;

IC475C: (4) RJ-45;

IC476A: (1) DB25 male or female, (1) terminal block;

IC477A: (1) DB25 male or female, (1) DB25 female (RS-530);

IC478A: (1) DB25 male or female, (1) DB25 male

(RS-530);

IC479C: (2) RJ-11, (2) RJ-45;

IC480C: (4) RJ-45

IC520A: (1) DB25 male or female, (1) 4-screw terminal block

IC521A: (1) DB25 male or female, (1) RJ-45

**Transmit Level** — IC470A-

IC473A, IC476A-IC478A:

2V ±10% differential output voltage; IC474C, IC475C, IC479C, IC480C: 0 dBm

**Mean Time Between Failure (MTBF)** — 239,906 hours

**Operating Temperature** —

0 to 60°C (32 to 140°F)

**Humidity** — Up to 95%,

noncondensing

**Altitude Tolerance** — Up to

3048 m (10,000 feet)

**Power** — From the RS-232

interface (except rackmount cards)

**Size** — IC470A-IC473A:

5.6 x 4.6 x 2 cm

(2.2"H x 1.8"W x 0.8"D);

IC474C, IC475C, IC479C,

IC480C: 7.9 x 2.5 x 13.7 cm

(3.1"H x 1"W x 5.4"D);

IC476A-IC478A, IC520A-

IC521A: 6.9 x 5.3 x 1.8 cm

(2.7"H x 2.1"W x 0.7"D)

**Weight** — <0.5 kg (<1 lb.)

## Ordering Information

This information will help you place your order quickly.

| PRODUCT NAME                                   | ORDER CODE  |
|--|-------------|
| Async RS-232↔422/530 Interface Converter       |             |
| DB25 male/terminal block .....                 | IC470A-M    |
| DB25 female/terminal block.....                | IC470A-F    |
| DB25 male/DB25 female .....                    | IC471A-M    |
| DB25 female/DB25 female.....                   | IC471A-F    |
| DB25 male/DB25 male.....                       | IC472A-M    |
| DB25 female/DB25 male .....                    | IC472A-F    |
| DB9 male/terminal block .....                  | IC473A-M    |
| DB9 female/terminal block.....                 | IC473A-F    |
| Rackmount Cards (Dual)                         |             |
| RJ-11/RJ-45.....                               | IC474C      |
| RJ-45/RJ-45 .....                              | IC475C      |
| Async RS-232↔422/485 Interface Converter       |             |
| DB25 male/terminal block .....                 | IC476A-M-R2 |
| DB25 female/terminal block .....               | IC476A-F-R2 |
| DB25 male/DB25 female .....                    | IC477A-M-R2 |
| DB25 female/DB25 female.....                   | IC477A-F-R2 |
| DB25 male/DB25 male.....                       | IC478A-M-R2 |
| DB25 female/DB25 male .....                    | IC478A-F-R2 |
| Async RS-232↔2-Wire RS-485 Interface Converter |             |
| DB25 female/terminal block .....               | IC520A-F    |
| DB25 male/terminal block .....                 | IC520A-M    |
| DB25 female/RJ-45.....                         | IC521A-F    |
| DB25 male/RJ-45.....                           | IC521A-M    |
| Rackmount Cards                                |             |
| RJ-11/RJ-45.....                               | IC479C      |
| RJ-45/RJ-45 .....                              | IC480C      |
| You may also need:                             |             |
| MicroRACK 2.....                               | RM202       |
| MicroRACK 4.....                               | RM204       |
| MicroRACK 8.....                               | RM208       |
| MicroRACK 16 .....                             | RM216       |
| Specify one power supply for each rack:        |             |
| MicroRACK Power Supply                         |             |
| AC Power.....                                  | PS460AE     |
| 48-VDC Power.....                              | PS461A      |
| 24-VDC Power.....                              | PS462A      |
| 12-VDC Power.....                              | PS463A      |

### The complete package

What you get when you order the Interface Converter or Card

- (1) Interface Converter or Rackmount Card
- (1) User's manual
