LightCrimp SC Termination Kit

Everything you need to crimp like a pro.

The Cleave Tool is only one of the many useful tools included in your Kit.

Key Features

▶ *Terminate, cleave, and polish fibre—everything you need is included.*

▶ *Complies with EIA/TIA 568A standards.*

Technically Speaking

Here's everything you need to make SC fibreoptic crimp connections: micro and miller strip tools, polishing accessories, a cable stripper, a cleave tool—the list goes on and on.

From the moment you prep the cable until you inspect the final product, Black Box comes through with the tools you need. And detailed instructions take you through the crimping process step by step.

Since there's no epoxy, adhesives, or curling ovens involved, connections are neat and clean. And you'll get reliable, repeatable matings with these SC connectors.

If you already have a LightCrimp ST Termination Kit and would like to terminate SC connectors, you'll need the LightCrimp Upgrade Kit (FT515).
