RF WIRELESS KEYBOARD

Go wireless—it's simple, convenient, and inexpensive with the RF Wireless Keyboard.

Key Features

▶ ***Complete wireless control of a PC.***

▶ ***900-MHz RF transmission for omnidirectional operation.***

▶ ***Works with any IBM compatible computer.***

▶ ***Plug-and-play.***

▶ ***Sleep mode conserves battery power for longer battery life.***

▶ ***Use multiple RF Wireless Keyboards in the same location.***

Control a computer over distances, between rooms, or through walls—without cables! The RF Wireless Keyboard is superior to traditional infrared keyboards and more economical than previous RF keyboards.

This lets you control a computer via 900-MHz transmission from a range up to 100 feet (30.5 m) with 360° operability in optimal conditions.

An integrated touchpad mouse provides cursor control for complete wireless control of a PC. And the Keyboard functions with any IBM compatible computer.

What's more, it's plug-and-play, so there's no software required and installation is easy.

Sleep mode conserves battery power for longer battery life.

Need to operate more than one computer at the same location? No problem. The RF Wireless Keyboard uses 32 transmission channels that operate at different frequencies so you can use multiple RF Wireless Keyboards in the same location.

What the Package Includes

- RF Wireless Keyboard
- RF Receiver
- Mini-DIN-to-DIN Adapter
- Users' manual

Black Box Network Services - The world's largest network services company
