NETWORK SERVICES

MegaRAC-K1

Key Features

- ▶ No rack or desktop space used.
- ▶ Provides remote video display, fast redirection and animation.
- ▶ Allows remote keyboard and mouse control.
- ▶ Sits outside the KVM, server or computer.
- ▶ Attaches to standard KVM or computer ports.
- ▶ USB 2.0 mass storage emulation allows the local computer to boot from a remote drive over the network.

Brand new class of KVM features a zero-U, standalone digital KVM over IP solution that attaches to a PC, server or analog KVM. This instant, clutter-free, space-saving and non-intrusive management solution overseas a computer system and gives system administrators complete KVM redirected and associated control over a server from anywhere in the world.

The MegaRAC K1 does not take up any desktop or rack space, sits outside the KVM, server or computer and does not affect local operations. With a simple installation, customers of any variety can receive remote management with ease, at a fraction of the cost of other KVM over IP solutions on the market.

Key Benefits

- Internet monitoring and control of any server/PC:
- Attaches to an analog KVM, Server or PC
 - Provides remote monitoring of video
 - Allows remote control of keyboard/Mouse
 - Controls any PC/Server anywhere from anyplace.
 - Non-Intrusive
 - Easy to set-up
 - Retrofit

Performance:
Provides incredible video performance

Attaches to an existing analog KVM to create an IP Solution. The user can:

- Upgrade existing analog KVM switch installations, easily and conveniently, to a KVM over IP. The user receives significant cost savings, allowing them to continue to deploy their existing analog KVM switches.
- Control multiple servers using just one MegaRAC K1 by attaching to a multi-port analog switch
- Display multiple views; multiple remote sites can simultaneously monitor the MegaRAC K1.
