PC Expansion

Multi-User network computing terminal

Key Features

- ▶ High speed computing equivalent to the host PC
- ▶ Save up to 80% of your hardware cost with PCExpansion
- ▶ Quick and easy to install
- ▶ Maintenance free

What is PCExpansion?

PCExpansion is the world's first terminal unit that does not require a CPU, hard-drive, or CD-ROM yet executes as if it's an ordinary PC. With PCExpansion's exclusive UTMA (Ultra Thin Multi-Access™) technology, PCExpansion allows you to expand your existing PC up to 10 computer terminals.

Why Select PCExpansion?

• Cost effective: Save up to 80% of your hardware cost versus buying a P4 or equivalent PC, PCExpansion gives any office or home users the opportunity to expand an existing host PC easily and affordably.

Wireless Setting *

Take the benefit of PCExpansion Solution to the next level by adding wireless protocol.

*Wireless router and bridge required.

• No maintenance required: You only have to maintain and upgrade the host PC, PCExpansion requires no hardware maintenance, only occasional software updates.

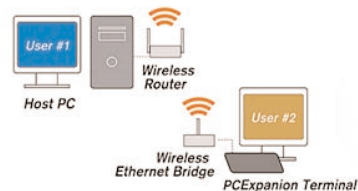

• Compatibility: PCExpansion will run Windows based applications on your host PC: internet browsing, email, office suites, most games and much more. (except 3D games or applications)

• Simultaneous Windows operation: Both host PC and PCExpansion terminals can run independently and execute same application programs separately. (please check your software's End User License Agreement regarding the license requirements).

• Small sleek design: Space saving design allows more room for your office or desk area.

• No noise output and low power consumption: Quiet operations while saving energy costs.

• Supports high resolution monitor display: 640 x 480, 800 x 600, 1024 x 768, 1280 x 1024, 16 bit color.
