## NETWORK SERVICES

# Wall-Mounted Enclosures

## Key Features

▶ Delivered as a kit.

▶ One man can complete the job.

▶ Save time and money.

▶ Back panel can be used as a jig.

▶ Maximum accessibility.

▶ Smart design.

▶ Easy to carry assembly kit

Why make things difficult, when they can be done easily? This new Wall-Mounted Enclosure from Black Box has distinctive features like functional and easy-install design, and increased efficiency.

These wall-mounted enclosures are specifically designed for installation within premise ICT networks, according to the wishes and demands of installers and end-users. It is a concept that's immediately functional.

Multiple depths and heights provide a high flexibility for your applications.

The basic frame consists of a wall panel with integrated cable and pull relief, four depth posts, two cable-entry plates (top and bottom) and a set of 19″ mounting posts.

The plating consists of two top and bottom plates with ventilation shafts on the rear side, two side panels and a security glass door with an EK-333 cylinder lock and a handle.

They can be assembled quickly and easily and disassembled just as fast. Easy access is a key feature for anyone working with housings, saving you money and time during the first installation and in later management of the network.
