Data Cabinets

Key Features

▶ Support up to 850 kg.

▶ Mix and match different types of cabling and servers in one cabinet.

▶ Different heights from 12 to 46U.

▶ 60 or 80-cm width.

▶ 60 or 80-cm depth.

▶ Compliant with IEC 297-1/2 standard.

▶ Modern design.

▶ Elegant grey finish (RAL 7047).

Fully Assembled Data Cabinets

This well-designed BLACK BOX® server cabinet range is the first system to universally embody the development from 19" to metric. The system is ideal for housing servers, network components, and cabling infrastructure. The cabinet design is advanced, sturdy and modern and, because it meets with the ETSI (European Telecommunications Standards Institute) specifications, is suitable for use in all European countries.

There is a range of variable heights of 12, 16, 21, 25, 37, 41, and 46U. You can choose a width of either 60 or 80 cm, and a depth of 60 or 80 cm. For 100D cm cabinets, see our Server Cabinets Ultimate

Extension Data Cabinets

When you need to install several cabinets in a row, use these Extension Cabinets. They include exactly the same components as the Fully Assembled 19" Cabinets except for the two Side Panels.

You simply order a Standalone Cabinet and as many Extension Cabinets as required. Then, you will use one of the Side Panels of the Standalone Cabinet and place it on the last Extension Cabinet in the row.

Each Extension Cabinet also includes as many Coupling Sets as necessary.

Tech Specifications

Frame — Lightweight aluminium extrusion with grey powder coating RAL 7047
**Load Bearing Capacity —** 850 kg
