

# Firmware revision information for:

## Wizard IP Plus

### Version 0.3

Original shipping release.

### Version 0.4

1. File transfer changes. General changes to how the mass storage device is handled.
2. Various other minor user interface changes.

### Version 0.5

*February 2007*

1. New DHCP client. This version includes a new DHCP client which resolves a problem with system lock-outs when using dynamically allocated IP addresses (i.e. not fixed IP addresses).
  2. Various other minor user interface changes.
