

Pure Home Networking MDU Module Bracket with (2) MDU and (1) CATV Module Openings, 1 Unit, Full Size

1. Specifications

Size: 2.9"H x 13.2"W (7.4 x 33.5 cm)

Weight: 0.3 lb. (0.1 kg)

2. Introduction

The MDU Module Bracket with (2) MDU and (1) CATV Module Openings, 1 Unit, Full Size is made of heavy steel. It holds two MDU Telephone/Data Modules and one MDU Bidirectional CATV Video Splitter Module.

This bracket should be installed in one of the Pure Home Networking Boxes (JHN1014A, JHN1020A, JHN1030A, or JHN1040A).

3. Installation

3.1 Cable Handling Guidelines

- Do not route telephone cables through the same cable holes as the AC power cables.
- For safety, separate all telephone cables from parallel AC power lines by at least 6 inches (15.2 cm) whenever possible. Avoid kinking the cable.
- Do not attach cable tie-downs too tightly. The cable-fastening hardware should not compress the cable sheath.

- Do not bend the cable sharply. Place the cables properly in the cable management after passing them through the holes, since the edges of the hole can compress or damage the cable sheath.
- When installing an individual module in the Pure Home Networking Box, place it above or below the interfacing module (if possible). This will eliminate excessive cable crossing.
- For your safety, do not use this or any electrical product near water (unless it is specifically designed for wet areas). Do not install wiring during thunder and lightning storms.

- Use caution when handling or installing any computer, telephone, video, or electrical devices.

3.2 Attaching a Module to the Module Bracket

To install the MDU Module Bracket, snap the module into the bracket. Then press the pushbuttons on the bracket to lock the module in place.
