

Installation

This installation guide gives step-by-step instructions about how to install the LBG1001C Module

Selecting a combination for the plug-in module of LBG1001C Module

Fiber Plug-In Modules are available for Multi-mode and Single-mode with SC connectors.

Follow These Steps for Installation:

- Step 1:** Turn off the power before installation. Push the ON/OFF rocker switch to the 0 (OFF) position.
- Step 2:** Locate the module cover plate. It is located in the front of most models.
- Step 3:** Unscrew the plate and carefully remove it from the switch.
- Step 4:** Retain both the screws and the cover plate. The plate must be reinstalled if the module is removed.
- Step 5:** Slowly slide the Plug-In Module into the port, following the plastic guides.
- Step 6:** Snap in the Plug-In Module to attain a firm connection.
- Step 7:** Tighten the screws from itself.
- Step 8:** Restore power.
