1. Specifications

Protocol —	Transparent to protocol
Speed —	Up to 2048 kbps
Operation —	Full duplex
Interface —	RS-422/CCITT V.36, wired as DTE, provides DCE to DCE cross cable function
Connectors —	MC126A-F: (2) DB25 female [(2) adapter cables are included, each with (1) DB25 male and (1) DB37 female connector]; MC126A-M: (2) DB25 female [(2) adapter cables are included, each with (1) DB25 male and (1) DB37 male connector]
DCE-to-DCE Buffering —	Two 512-bit buffers set to 256 bits in case of overflow or underflow

TAIL-CIRCUIT BUFFER (TCB-422)

Temperature —	32 to 122°F (0 to 50°C)
Humidity Tolerance —	Up to 95%, noncondensing
Power —	No AC power required; Derives power from RS-422 data and clock signals
Size —	5.3"H x 1.2"W x 2"L (13.5 x 3 x 5 cm)
Weight —	0.26 lb. (0.12 kg)

2. Introduction

2.1 Description

The TCB-422 is used as an interface between two internally clocked synchronous devices. It synchronizes the clocking signals between two independently clocked DCE devices when neither DCE device can be clocked externally. A typical modem tail-circuit application is shown in Figure 1.

Two 512-bit buffers reduce errors caused by drift between the two clocks of the DCE devices.

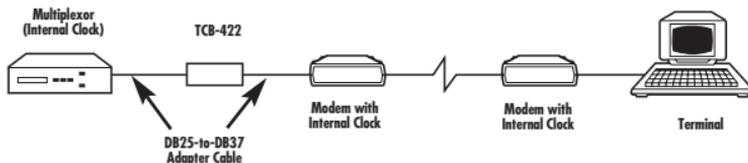

Figure 1. Typical Application.

2.2 What's Included

- (1) TCB-422
- (2) DB25-to-DB37 adapter cables
- This users' manual

3. Installation

To install the TCB-422:

1. Remove power from the two devices that you want to connect to the TCB-422.
2. Locate the two DB25-to-DB37 adapter cables that were included in your TCB-422 package. Plug the DB25 male connectors of each adapter cable into the DB25 female connectors on the Tail-Circuit Buffer.
3. Connect the DB37 connectors of each adapter cable (male or female, depending on your model) to your RS-422 devices.

NOTE

If the adapter cables are not long enough and you must add additional cables to reach your equipment, the total cable length from the TCB-422 to each device must not exceed 6.6 feet (2 m).

4. Apply power to the two RS-422 devices connected to the TCB-422.

The TCB-422 is now ready for operation.
