

2U Wallmount Cabinet

Before installing the 2U Wallmount Cabinet, check it carefully for shipping damage. If you notice any, contact Black Box immediately at 724-746-5500. The Cabinet's key features and specifications are:

- It holds equipment designed to be placed in 2U (3.5", 8.9 cm) of vertical space in a 19" rack. The Cabinet's mounting rails are near the top of the Cabinet and face forward.
- You can take cables and power cords in and out of the Cabinet through any of its four round side-mounted cable knockouts (two on each side). These knockouts have grommeted edges to protect your cables and are 4" (10.2 cm) in diameter. (To remove a cable knockout, push down on one side of the knockout and twist it back and forth until it breaks loose.)
- It's ventilated on both sides.
- Its door is lockable (but is shipped unlocked) and is hinged on the left. The door does not latch unless it is locked. You should have received two keys for it, taped to the inside of the Cabinet.
- Its enclosure is 16-gauge steel, powder-coated in textured black.
- Its outside dimensions are 20"H x 20.75"W x 4.5"D (50.8 x 52.7 x 11.4 cm). Its inside dimensions are only slightly less, by the thickness of the exterior steel.
- It weighs approximately 25 lb. (11.4 kg).

2U WALLMOUNT CABINET

To mount a device in the Cabinet, use the same hardware that you would use to mount the device in a 19" rack, but mount the device so it *hangs vertically* (with its bottom against the back of the cabinet and its front panel facing upward). Use screws, bolts, or cage nuts (not included) to secure the device or its rackmount bracket to the inside rails of the Cabinet as you would secure it to the side rails of a rack.

If you have questions about completing your installation at your site, contact your site's facilities or building-maintenance personnel, or consult a building contractor.

We offer a wide variety of cable-management and other accessories that you might find useful for your application. Call Black Box Technical Support at 724-746-5500 for more information.
