# 1. Specifications

<b>Indicators</b> —	(7) Tri-state LEDs: TD, RD, DTR, DSR, RTS, CTS, DCD
<b>Connectors</b> —	(2) DB9: (1) male and (1) female
<b>MTBF</b> —	2,889,338 hours
<b>MTTR</b> —	1 hour
<b>Operating Temperature</b> —	32° to 140°F (0° to 60°C)
<b>Humidity</b> —	95%, noncondensing
<b>Altitude</b> —	10,000 feet (3048 m)
<b>Power</b> —	No AC power or batteries required; gets its power from RS-232 data and control signals
<b>Size</b> —	2.2"H x 1.2"W x $\frac{3}{4}$ "D (5.6 x 3 x 1.9 cm)
<b>Shipping Weight</b> —	1 lb. (0.5 kg)

## 2. Description

The DB9-Pocket Tester monitors the seven most important asynchronous RS-232 data and control lines.

No AC power or batteries are required; the DB9-Pocket Tester gets its power from RS-232 data and control signals.

Just attach the Tester directly to any asynchronous EIA-574 (DB9/RS-232) interface. All nine pins are wired straight-through.

Using seven large tri-state LEDs, the Tester indicates the presence of the following EIA-574 signals: TD, RD, DTR, DSR, RTS, CTS, and DCD (pins 1–4 and 6–8).

A red light indicates a Mark, a green light indicates a Space, and no light indicates no signal on the line.
